

Environmental Policy Statement

Founded in 1977, Hydrum Engineering Ltd is a privately owned sheet metal subcontracting company.

The 69,000sq ft factory, based in County Durham in the North of England, provides the full range of subcontract engineering services so that customers benefit from a streamlined supply chain, saving both time and money.

The engineering capabilities are laser cutting, guillotining, punching, folding, forming, welding, drilling, tube laser cutting and powder coating. The company is always striving to remain at the leading edge of its chosen field in providing a total sheet metal subcontracting package to a cross-section of customers. This policy applies to all operations and activities within Hydrum Engineering.

Hydrum Engineering Ltd carries out all its operations in an environmentally responsible manner implementing and maintaining compliance to the environmental standard ISO14001.

Hydrum will achieve its environmental aims by adhering to the following principles:

- Complying with all applicable laws and regulations and other requirements to which we subscribe and implementing programs and procedures to ensure compliance.
- By the education and training of employees in environmental issues and the environmental effects of their activities.
- Employing management systems and procedures designed to prevent activities that pose a threat to the environment. Hydrum Engineering will prevent pollution and protect its employees and surrounding communities in which we operate by employing safe technologies and operating procedures, as well as being prepared for emergencies.
- By striving to prevent releases to the atmosphere, land or water. Hydrum will minimise the amount of waste generated and will ensure the safe treatment and disposal of waste.
- Continually improving our environmental performance and management systems through the development of objectives and targets, which are reviewed by Management.
- Monitor and minimise our Carbon Footprint through implementing ongoing energy and fuel efficiency measures.
- Communicating and co-operating with employees, local authorities, suppliers and customers concerning the environmental implications of Hydrum's activities and improvement programs.

The company's environmental policy is communicated to employees, suppliers, contractors and distributed to interested parties and the public on request.
